-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by any one of Spendel (US Patent No 4,489,455) and Minayoshi et al (US 200100115082 and JP 2001-178985).

All cited documents teach methods comprising conducting washing and drying cycles according to an operational program and thereafter conducting drying. The documents teach operation of pumps fans, heaters, motors, and valves during drying.

See entire documents, especially Description of the Preferred Embodiment in Minayoshi et al and columns 5-14 in Spendel.

Response to Arguments

3. Applicant's arguments filed 03/06/2006 have been fully considered but they are not persuasive.

The applicants argue that Minayoshi et al do not teach a step wherein dewatering and drying are conducted simultaneously with circulating air.

This is not persuasive. The applicant's argument contradicts to the teaching of Minayoshi et al. See at least Abstract and the detailed description of the referenced step at Figure 3 and [0052] – [0072].

The applicants argue that Spendel does not teach a step wherein dewatering and drying are conducted simultaneously with circulating air.

This is not persuasive because Spendel in contrast to the applicant's statement teaches circulating air in all steps prior to the last drying. See the parts of the document cited in the rejection, especially column 8, line 6 – column 9, line 21 and column 14, lines 18-35.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
